**Customer Information**

Dear Customer,

although the Corona epidemic has arrived Austria and affects our daily life intensively, we want to let you know that **our production is still running**. Our employees are undertaking everything to keep Sanochemia on going and producing.

**What have we done in the last days?**

- those employees who can work from home office are doing this already
- we have installed additional access- and hygienic rules to our facilities
- we have separated employees from each other to keep a minimum personal distance

**Our warehouse is working and is shipping goods**, our production is running and is producing vials.

We hope that Austria and the whole world will overcome this crisis very soon to come back to a normal way of working.

With kind regards

Dr. Timo Bender
